Career Objective

Motivated B.Tech graduate with knowledge of networking fundamentals, Python programming, Linux, and data visualization. Hands-on experience in IT support, Power BI dashboards, and machine learning projects. Seeking an entry-level IT Support Engineer or Network Technician role where I can apply technical skills and continue learning emerging technologies.

Education

Qualification	Institute	Year	Percentage
B.Tech	Maharana Pratap University of Agriculture and Technology	2021-2025	64.00%
Class 12	Navodaya Bal Senior Secondary School, Kaithoon kota (raj.)	2020	71.20%

Technical Skills

- **Networking & Systems:** TCP/IP, DNS, DHCP, LAN/WAN, Linux Fundamentals, System Troubleshooting
- **Programming & Web:** Python, HTML, CSS, Basic JavaScript
- **Data & Visualization:** Power BI, Dashboard Creation, Data Analysis
- **Tools & Platforms:** Jupyter Notebook, Visual Studio Code, MS Excel, MS Word, MS PowerPoint

Experience & Training

- Gained hands-on exposure to networking concepts including TCP/IP, LAN, WAN, DNS, and DHCP.
- Worked on Python programming and Linux fundamentals through online technical learning platforms.
- Performed basic system and network troubleshooting exercises.
- Built beginner-level machine learning and data visualization projects.

Projects

Property Price Prediction System

Built an AI-based system using Linear Regression and Decision Tree to predict real estate prices based on area, location, and room count with a web-based interface.

Power BI Supermarket Dashboard

Created an interactive dashboard for supermarket sales analysis with KPIs, charts, and trend visualizations.

Snake Game Development

Developed a Python-based Snake Game with score tracking and gameplay logic using Python programming concepts.

Certifications & Training

- CodeSoft Online Training (2024)
- Udemy Python & Networking Courses (2023)
